

LETTER OF ENDORSEMENT
(To be submitted in English)

Name of applicant: Tamar Chachibaia

Ms Tamar Chachibaia worked under my supervision as associated consultant in the Neurosurgery Center of Tbilisi State Medical University General Hospital. The reason of her permission to integrate in our clinical practice is the collaboration agreement with pharmaceutical firm EBEWE-pharma (she is employee) and our medical staff; to conduct IV clinical trial of companies propriety drug (CEREBROLYSIN) efficacy in several conditions. Ms Tamar Chachibaia is coordinator of trial. Recently we edit our mutual publication: "Current State of the Art in the Management of Pituitary Tumors". This is presentation of large review material, so we introduce all theoretical references. Regarding T. Chachibaia, I can say that she is very hard working person, restless and demanding when matter concerns to professional interests. Personally she is human and tolerant, able to share joy and mishap with colleagues. So I give her my best recommendations.

Letter of endorsement is given to be presented in the GUUS.
